Ando et al (US Patent No. 4,622,263) teach a water absorbing web comprising a porous element made of polymeric material comprising a block-copolyetheresters i.e. polyether-ester copolymer having hydrophilic and hydrophobic segments (see abstract; col. 1, line 54 – col. 3, line 51) including claimed specific hydrophobic segments as well as claimed hydrophilic segments. However, Ando et al neither teach nor suggest the method of claim 13 for removing substances from blood products comprising feeding blood products through the microfilter and the blood purification device of claim 15 comprising a blood bag device including a first bag in fluid communication with a second bag via the microfilter. Although the composition of the filter material is known in Ando et al, none of the prior art of record teaches or suggests the use of the known filter material for blood filtration to remove leukocytes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 5,681,645 and US 2004/0121678 A1 teach co-polyether ester materials for filtration.
